## FOREWORD

In the year 1950 a multitude of progressive steps have been taken in the field of mental health, all of which have placed Pennsylvania still higher on the ladder of national leadership. This can be attributed in great degree to the progressiveness of the administration of the Honorable James H. Duff, Governor of the Commonwealth of Pennsylvania, who has been the guiding force behind the great mental health program we now enjoy.

For the past three years, and to a lesser degree this year and in the years immediately following, Pennsylvania has been concerned with replacement of obsolete and out-moded physical facilities in a program unmatched anywhere in the United States. More than \$140,000,000 has been channeled into a vast program designed to modernize our mental health facilities. No new hospitals have been constructed but existing mental institutions have been utilized, improved and expanded to meet the needs of the present day demands.

However, during this period great emphasis has been placed on the treatment of the mentally ill and as a result we are today running as high as 73% in the return to society of first admission patients. We have just begun an expanded treatment program. With the construction of the Eastern Psychiatric Institute, for which final plans were completed during the current year, research into improved methods of treatment will be forthcoming and we will also have increased trained personnel. Complementing the Eastern Psychiatric Institute is the older and now well established Western Psy-

chiatric Institute at Pittsburgh. Combined, these two Institutes will form the keystone for the finest mental health system this country has ever known.

The statistics contained in the following pages illustrate in some degree the progress made in the field of mental health in Pennsylvania. Admittedly statistics are dull reading but nevertheless they do reveal true facts which are indisputable. The statistics contained herein exemplify this fact. The sixteenth Annual Statistical Report is herewith submitted with this thought in mind.

# STATE INSTITUTIONS FOR MENTALLY ILL AND MENTALLY DEFICIENT INCLUDING ELWYN POPULATION — MAY 31 1932 — 1950

## BUREAU OF MENTAL HEALTH

This presentation is the sixteenth of consecutive annual reports on selected statistics derived from the Commonwealth's mental institutions for the fiscal year ending May 31, 1950.

The tables herewith submitted are standard patterns in common use and do not by any means cover the available data at hand with the punch-card system. The need for a revision of tabulations was raised in our 1946 preface since it was felt that some of the tables were either too relative or of less significance than formerly. In addition these tables represent a rigid classification over twenty years old and some are not in accord with the changes of psychiatric thought since that time. We are gratified to note that efforts are now being made to appraise and possibly change the existing pattern of tables. We refer to the thorough review now being given by the American Psychiatric Association's Committee on Nomenclature and Statistics and to the pending conference on mental statistics to be held by the F.S.A.'s Public Health Service's Section on Biometrics.

Our public mental institutions, state-owned and state-operated number twenty-one, divided into the following categories: seventeen for the mentally ill, three for the mentally defective, and one for the epileptics. The statistical tables deal only with these. However, we also hear from the several V.A. facilities and from a group of private licensed mental schools and hospitals but the number of beds involved is less than ten percent of the total and our statistical control is not as all-inclusive toward specific

tabulations.

The period covered is toward the end of Governor Duff's administration which marked an extensive program of rehabilitation and expansion of all state mental institutions. The relief of overcrowding is still gradual as additional units come to completion. This may be noted in the increase of rated capacity totaling 824 more beds for the mentally ill and 650 additional beds for the mentally defective and epileptic. The full impact of investment of some 140 millions of dollars will undoubtedly be felt in another couple years when an over-all addition of about 8,000 beds will be available. Along with this, of course, will be more adequate treatment facilities since our institutional program is based upon functional design for treatment and living space.

In passing we should note that first admissions over the age of sixty years are still increasing so as to constitute now 31.4%. Of this elderly group three-fifths are seventy years and over. In the diagnostic classification the seniles and sclerotics have now jumped to 25.6% of all first admissions.

If present day active therapies are shortening the hospitalization period to less than five months expectancy and increasing the returns home to over 70% (if the old age group is discounted), as has been reported in a few of our main line hospitals, then what is happening to our backlog accumulation from previous years? The answer is not yet in evidence in the statistics over the past ten years. Naturally those of long enough residence to be beyond the active treatment phase tend to remain longer at the institution. From the table below which indicates a shift from the five to ten year residents to those of ten years or longer does it mean that we shall become

stabilized with about 10% of our beds devoted to active treatment with rapid turnover while 90% of our beds will be occupied by long term residents with little or no turnover?

|                     | <u>1940</u> | <u>1943</u> | <u>1950</u> |
|---------------------|-------------|-------------|-------------|
| Total Census        | 21,737      | 34,447      | 36,867      |
| Total Admissions    | 4,261       | 7,108       | 7,135       |
| Length of Residence |             |             |             |
| Less than 1 year    | 12%         | 13%         | 11%         |
| 1-5 years           | 26%         | 34%         | 26%         |
| 5-10 years          | 24%         | 18%         | 21%         |
| 10 plus years       | 38%         | 35%         | 42%         |

The year 1943 is added in the table since it represents the acquisition by that time of most of the mental institutions to the state system from the political subdivisions. However, the tendency has remained the same through each successive year, namely, at any one time less beds are being devoted to patients staying less than one year while succeeding years are shifting to increase the number of beds devoted to longer term residents.

Fortunately, there are other factors at work in the over-all mental health program. A mental hygiene education for prevention is just beginning as well as pre-clinic and clinic facilities for early recognition and prevention. We shall speed up the establishment of psychiatric wards in general hospitals for early treatment. The Psychiatric Institutes for teaching, training, and research will inevitably influence the long range program. An expended program of institutional rehabilitation to follow through specific medical procedures to the final adjustment at home and in the community must

be undertaken. Then, if a status quo has not been meanwhile forced upon us by another world-wide conflict we can hope to have an irreducible minimum of the annual increment to the census of long term guests and leave the backlog of permanent guests from by-gone years to dispose of themselves gradually within our lifetime.

COMMONWEALTH OF PENNSYLVANIA

SIXTEENTH  
ANNUAL STATISTICAL  
REPORT

*of the*

Department of Welfare

WILLIAM C. BROWN

*Secretary*

1950

Bulletin No. 97

Penal

Section B

## FOREWORD

Penal affairs in Pennsylvania is each year coming more and more to the forefront of our thinking. The dark days of simply locking a prisoner behind bars and forgetting about him until the expiration of his sentence has long since become obsolete and forcefully pushed into the background.

Today we in Pennsylvania are concerned with rehabilitating to the finest degree possible those who make up our penal and correctional population. New programs are under way and within the next few years are scheduled to be vastly enlarged.

The Annual Statistical Report for the period June 1, 1949 to May 31, 1950 provides interesting comparison of activities in our penal and correctional institutions in Pennsylvania, both State-owned and non State-owned. It is interesting to note the changes on which commitments have been made during the year to the State penitentiaries and the industrial schools. The various ranges of age for commitment to our penitentiaries and industrial schools, in relation to the offense, is also of considerable interest.

An increase in the trend of the population in our county prisons is noteworthy after a ten year low reached in 1944. All of this points to the need for a greater program of care and treatment for those confined to our penal and correctional institutions.

A comparison of statistics contained in this Report will provide

many clues as to the progress of the Commonwealth of Pennsylvania in penal and correctional affairs. I am confident this Report will be of interest and concern to all of those actively engaged in these matters.

## BUREAU OF PENAL AFFAIRS

The Bureau of Penal Affairs, formerly the Bureau of Corrections, of the Department of Welfare, is delegated under the Administrative Code and is responsible for the supervision and regulation of all Penal and Correctional Institutions of the Commonwealth.

Minimum Standards, Rules and Regulations have been promulgated by the Department of Welfare with the approval of the Welfare Commission, relative to the physical, maintenance and administrative policies now in vogue in the Penal and Correctional Institutions of the State. It is the duty of the Bureau to visit and inspect, at least once a year, all State-Owned Supervised Penal Institutions to ascertain that all standards set up by the Department of Welfare are being carried out and the Acts of Assembly pertaining to the Penal Institutions are being complied with.

The institutions inspected and supervised by the Bureau of Penal Affairs are as follows: Eastern State Penitentiary, Philadelphia; New Eastern State Penitentiary, Graterford; Western State Penitentiary, Pittsburgh; New Western State Penitentiary, Bellefonte; State Industrial Home for Women, Muncy; Pennsylvania Industrial School, Camp Hill; Pennsylvania Institution for Defective Delinquents, Huntingdon; Allegheny County Workhouse, Blawnox; House of Correction, Philadelphia; 68 County Prisons and 421 city, borough and township lock-ups.

Crime in the State showed an increase during the period from June 1, 1949 to May 31, 1950. Penologists throughout the State are of the opinion

that the upward trend in employment due to the defense program, will no doubt reduce crime during the next few years, as idleness and unemployment are two of the main factors which contribute to crime.

Continued emphasis in the State Penal Institutions must be placed upon rehabilitation as well as custody. We are hopeful that in the near future sufficient appropriations will be made available so that the state will be able to enlarge and create a correctional program which will meet the increased demands for the treatment of crime and delinquency.

**Section C**

THE  
CONSTITUTION  
OF

THE  
UNITED STATES

JOHN F. KENNEDY  
PRESIDENT

## FOREWORD

In this the Sixteenth Annual Statistical Report of the Department of Welfare it is possible to see at a glance the operation of many of the functions of the Department of Welfare. Actually the Sixteenth Annual Statistical Report is contained in three sections of which this is one. The other two sections are concerned with (1) the Pennsylvania mental health system and (2) the Pennsylvania penal and correctional system.

Statistics can be of invaluable information. They denote trends, they denote progress and they denote retrogression.

The Sixteenth Annual Statistical Report is concerned with activities during the period from June 1, 1949 to May 31, 1950. In this Report will be found statistics concerning the Bureau of Children's Services, the Bureau of Homes and Hospitals, the Bureau of Institutional Management and the State Council for the Blind, the latter an Administrative Board within the Department of Welfare.

From the figures contained herein it is possible to obtain a detailed analysis of operating costs of Pennsylvania's 39 State-owned institutions. It is possible to determine the degree of work accomplishment in nearly all factors of institutional management, whether it be the pursuit of agriculture, laundry practices, etc.

An analysis of hospital services provided by the ten State-owned general hospitals is available. The work of the Bureau of Children's Services can be seen at a glance from the statistics contained in the Report covering child care. The results of inspection of county homes, and the services rendered under terms of the Solicitation Act are evident. The work of the State Council for the Blind is also contained in this Statistical Report.

Information contained herein should be extremely beneficial to all agencies and groups interested and concerned with welfare work in Pennsylvania.

## BUREAU OF INSTITUTIONAL MANAGEMENT

The Bureau of Institutional Management is responsible to the Commonwealth and thirty-nine State-owned Institutions for developing and supervising a program providing food, laundry, steam, light, water, sewage disposal, farm products and general maintenance. Standards for goals of performance are promoted. Key employees are called together for conferences on important problems. Monthly summaries of data reflecting efficiency of the food, laundry, hospital, farm and engineering service records are issued to institutions.

### Dietary

The Daily Basic Ration has been continued as the minimum requirements for an adequate low cost diet. The table showing the ration and the average daily consumption per person per day in 18 of the mental hospitals and schools for mental defectives is shown in this report. The ratio, if foods are carefully selected, compares favorably with the amounts set up in Planning Food for Institutions published by the United States Department of Agriculture; Bureau of Human Nutrition, Washington, D. C. About 3 ounces more food per person were served during 1949-1950 than in 1948-1949.

This increase in food consumption was done at a slight increase in food cost ie. 2¢ per per person per day. Government surplus food which was distributed to the institutions, accounts for some of the increased food consumption, particularly potatoes. Majority of the foods declined somewhat in cost with the exception of coffee, which increased about 12%. However, at the close of the year, food prices were increasing quite rapidly which is not reflected in the average costs for the year.

Salary costs continue to increase. This is due to filling of vacancies. The need for more personnel is due to additional facilities to

cover, and the straight eight (8) hour day.

The institutional food needs continued to be met to a high degree by the production of milk, meat, eggs, poultry and vegetables on the institutional farms. The preservation of food by either canning or freezing is a part of the food program. Close cooperation between farm and dietary departments must be closely maintained if a good standard of quality is maintained. The amount of food processed during 1949 was the equivalent of 659,255 #10 tin cans. This was slightly less than in 1949 which amount was 671,421 #10 cans. This program makes available at a lower cost those foods which are seasonal in production. Consumption is distributed more evenly over the entire year, thereby insuring a satisfactory diet for patients and employees.

#### Farms

Farming operations are carried on at 27 Mental and Penal Institutions. A total of 36,368 acres of land, of which 35,255 acres are owned, is thus controlled by the Commonwealth. Control of a considerable acreage of land by such institutions is desirable since it makes possible a degree of isolation which is extremely desirable both to the institution and the community. Land utilization provides wholesome occupation for approximately 2200 patients or inmates. This patient or inmate occupation is of necessity quite seasonal so that at certain times the number so occupied is much larger. Approximate patient or inmate occupation is indicated on the table headed "Acreage, Number of Patients Occupied on Farms". Definite plans are developed annually for the use of all land in order that the maximum contribution may be made to the overall institutional program. Approximate land utilization is shown in the table headed "Institutional Land -- Approximate Use in Acres". Planning conferences are held annually, consisting of institutional administrators, farm managers, dietitians, stewards and represent-

atives of the Department of Welfare. On such occasions, the whole agricultural program is reviewed and plans are laid for the following production season. Produced food has long played an important role in institutional economy. During periods of scarcity or high prices, institutions would frequently have lacked essential foods were it not for their own productive ability. In planning land use, priority is given to vegetables and potatoes since these products are essential to the institutional dietary and since procurement by purchase is frequently out of the question. All farm planning is correlated with institutional foods needs and optimum patient or inmate occupation.

Field crops to support livestock utilize the tillable acreage not required for vegetables, potatoes and orchards. All land management is planned, not only for maximum production but for conservation and development of soil resources.

Efficiency and production in major field crops is shown on the table headed "Crop Acreage and Total Yield". Vegetable acreage and production for the production season 1949, is shown on the table headed Vegetable, Acreage and Production". Milk production for the calendar year 1949 is shown by institution on the table labeled "Institutional Milk Production by Months". Institutional ownership of livestock as of May 31, 1950 is shown on the table headed "Institutional Livestock Census". Livestock production and efficiency for the fiscal year June 1, 1949 to May 31, 1950, is indicated on table headed "Institutional Livestock Production". Paid employment and per capita per day costs of farm operation at institutions is indicated on the table headed "Agricultural Activity, Paid Employees and Per Capita Per Day Costs". Progress in agricultural efficiency over a twenty-one year period is demonstrated by the final table captioned "Agricultural Efficiency, State-

owned Institutions".

### Laundry

The yearly summary of institutional laundry data gives average population, pounds of soiled goods, employees--paid and others, working cost and gross cost per pound of soiled goods. The population of institutions receiving laundry service, 62,334, is the highest on record. This figure reflects gradual increase in institutional population.

The total pounds of soiled goods, 54,467,168, is also the highest on record and reflects the gradual increase in population.

Laundry costs are slightly lower than for a year ago, gross costs being .0121 per pound, as compared with .0126. The slight change may be due to increased poundage as well as to improved supervision.

Patients and/or inmates employed in institutional laundries totaled 1,636, almost a hundred more than a year ago. Institutions must continue to depend on inmate or patient help to a large extent. The work opportunity provided is, however, considered of distinct value by institutional administrators.

### Laundry Test Bundle

In the table showing Laundry Test Bundle Analysis, a comparison of quality of performance is made between the first five test bundles run during 1935-36 and the 53rd test bundle, processed in 1949. Marked over-all improvement in quality is evident. Whiteness retention averaged 5% higher in the last test bundle. Soil removal averaged 29% higher in the last test bundle, which is 60% better than the average of the first five test bundles.

These test bundle analyses were made at the Ellen H. Richards Institute of the Pennsylvania State College. They constitute a part of the laundry supervisory service arranged through that agency and which services are made-

are made available to all State-owned institutions.

### Engineering

The engineering activities cover the various utilities used in conjunction with the operation of the institutions and the maintenance problems that effect the continuity of each of the utilities together with the care of physical property. The table indicating Quantities Used and Costs of Furnishing Operating Services covers a volume of items and corresponding costs for basic maintenance materials and utilities. Coal constitutes the largest single item.

The cost of coal for the year ending May 31, 1950 was approximately 3% below that for 1949. This cost was entirely due to better efficiencies as coal consumption for 1950 is approximately  $4\frac{1}{2}\%$  more than that for 1949.

The cost of coal, and the increased consumption of electricity, fuel oil, and water, therefore, total costs.

The overall expenditures are about 5% above those of a year ago.

Electricity purchased is 39% above that for the year 1949 with 3.4% higher cost. This increase is accounted for by about 35% additional load demand in new construction and the remainder to purchase electricity rather than replace existing generating equipment.

### Hospital Service

Analysis of Hospital Service at State-owned Medical and Surgical Hospitals are shown in the following tables:

Patients, Type of Service and Number  
Laboratory Analyses and X-Ray Examinations, Type and Number  
Clinic, Type and Attendance

The average daily population of the ten Medical and Surgical Hospitals was 1203, a slight increase over the previous year.

The table relating to Patients, Type of Service and Number shows

that there were 44,448 patients admitted in comparison to 43,668 last year.

The table on Laboratory Analyses and X-Ray Examinations shows a total of 578,178 laboratory examinations, or 13 tests per patient. The number of Basal Metabolism tests reported was 1207, a decrease of 87 over a year ago. The number of Electrocardiograms reported, 1826, is an increase of 72 over a year ago. Reports indicate an increase of 1537 blood transfusions, although administrations of blood plasma reveals a decrease of 346.

X-Ray examinations reported this year totaled 52,357, a decrease of 2024 over the previous year. An increasing amount of such work is apparently being done in Physicians' offices.

It will be noted in the table on Clinics, Type and Attendance, that the number of visits was 50,676, an increase of 1565 over a year ago.

#### Nursing Education

The table for Nursing Education in State-owned Hospitals shows that 82 students completed the three (3) year course in Nursing in the four (4) hospitals conducting schools, compared with 110 last year.

The number of students receiving Psychiatric Nursing affiliation was 1272, a decrease of 27 compared with the last report. The number of nursing schools represented was increased by ten (10). The foregoing report has been influenced by the fact that the Western State Psychiatric Institute and Clinic, which conducts an affiliate school, was transferred to the University of Pittsburgh as of August 31, 1949.

The Harrisburg State Hospital maintains a course for Licensed Attendants. The number of students completing the course reveals a slight increase over the previous year.

A nurse on the staff of the Torrance State Hospital took advantage of the Fellowship, offered by the Department of Welfare; for one (1) year of

advanced study in Psychiatric Nursing at the University of Pittsburgh and the Western State Psychiatric Institute and Clinic.

# TRI-COUNTY CHILD GUIDANCE CENTER

During the year of 1949 the Tri-County Child Guidance Center, a section within the Rural Child Welfare Division, provided the specialized services of psychotherapy, diagnostic studies, and consultation for 316 children. These services were given through 953 interviews of 45 minutes length with the children themselves, and 1471 interviews with the children's parents and other adults responsible for the children.

## COMMUNITY EDUCATION

| Total                          | 22       | 35                 | 121   | 178   |

In addition to the direct, specialized service given to individual children, who are emotionally disturbed or maladjusted, the Center has a program of general education carried out through institutes and speeches. This program is aimed toward assisting adults, professional and lay, in better understanding the needs and emotional problems of children.

The accompanying chart shows the number and types of such activities engaged in by the staff of the Center during the year.

financial requisitions of State-aided hospitals, requiring certain standards of adequacy in equipment and professional personnel.

### Hospital Construction

Under the Hill-Burton Act, Pennsylvania is allotted approximately \$9,000,000 annually to aid construction of non-profit hospital facilities for general care, tuberculosis, mental disease and chronically ill patients. Federal funds are allocated to hospital applicants on a priority basis outlined in The Pennsylvania Hospital Plan. The Division of Hospital Construction Administers the program which entails state-wide hospital planning, and supervision of construction programs at 40 institutions. Federal funds account for 40% of the total cost of construction under this program.

### Research and Statistics

This Division tabulates, assembles and disseminates statistical data obtained from the State-owned, State-aided, and State supervised institutions. It also prepares statistical analyses for the various Bureau and Division of the Department of Welfare. Included in the records of this Division are institutional data on population, personnel, dietary functions, laundry operations, farm and dairy production, and engineering statistics, all of which are available for comparative study by the various appropriate Bureaus and Divisions.

This report has been compiled by the Division of Research and Statistics, under the supervision of Mrs. Gertrude H. Thompson, with the advice and assistance in organization and presentation of the material from the Bureaus of the Department.

Ira J. Mills  
Director

## Family and Child Welfare

The supervision of 542 child-care institutions and agencies is the primary responsibility of this Division. In addition, the administration of several laws dealing with children's problems, such as the Juvenile Court Act, the County Institution District Act, as it pertains to children, and the licensing of Infant and Child Boarding Homes, is vested in this Division. The Act requiring the consent of the Department and the filing of a \$1000 bond by the applicant prior to placement of any child in Pennsylvania from any other state, is also administered by the Division.

## Rural Child Welfare

The Division of Rural Child Welfare within the Bureau of Community Work administers the funds made available to Pennsylvania under the child welfare services provisions of the Social Security Act. During 1949 this Division assisted the Commissioners in fifteen counties to develop or to strengthen their County Institution District services for dependent and neglected children. The statistics give a report of the number of children served in these counties, the sources from which they came to the agency, and the type of situation in which the children were living at the end of the year.

## Homes and Hospitals

This Division inspects, supervises and/or licenses approximately 566 institutions of the following types: Hospitals receiving State-aid for operation; private maternity hospitals and proprietary hospitals operated for profit; nursing and convalescent homes; maternity departments of sectarian hospitals; private hospitals operating under charters of the first class; institutions for crippled children; and tuberculosis preventoria. In addition, this Division reviews and approves for payment the quarterly

## BUREAU OF COMMUNITY WORK

The Bureau of Community Work, established in 1933, is comprised of the following Divisions: Administrative, Family and Child Welfare, Rural Child Welfare, Homes and Hospitals, Hospital Construction, and Research and Statistics.

### Administrative Division

This Division is responsible for the overall administration of the Bureau, which involves planning and implementation of programs and the recruiting, training and assignment of personnel numbering about 150.

Approximately 1150 institutions and agencies are supervised by the various Divisions, and hundreds of others are brought into contact with the Department through its administration of the Solicitation Act, the Non-Profit Corporation Act, the County Institution District Act, and consideration of Interracial problems which arise in many aspects of the work.

Briefly, the Solicitation Act was passed to protect merchants and citizens from unscrupulous agencies and persons soliciting for supposedly charitable, benevolent, patriotic and humane purposes. Section 212 of the Non-Profit Corporation enjoins the Department with specific responsibilities in the incorporation of certain charitable and eleemosynary non-sectarian institutions and agencies.

The interracial Consultant works with citizen groups to foster interracial cooperation and to create better relations and understanding among various racial groups within the Commonwealth.

The Consultant for Homes for the Aged not only inspects and supervises the 62 County Homes and 17 State-aided Homes, but also acts as consultant to other institutions and agencies concerned with problems of the aged.

\* Vacancy at end of year

Note: Comparing the total number of children receiving service in 1949 with the same figure for the preceding year, we find 480 more children for whom some degree of service was given this year than last. At the end of the year, however, only 67 more children were receiving service than on the same date in 1948, due to an increase in the number for whom service was terminated.

One of the functions of Child Welfare Services is to give consultation service to parents to help them procure for their children the special services which they need, or to work with parents toward improving their own care of their children, where these children have not been receiving the quality of care they need. Since there was increasing stress on this preventive service during 1949, the increase in terminations of service may be, in part, due to the effectiveness of this work with parents.

Note: It is to be noted that almost exactly half of the children for whom service was initiated during the year, or 1110 children, came to the attention of the county Child Welfare Services through direct application by parents or relatives, or through the interest and concern of other individuals. Judges requested service for 49 children, but only 98 children of the total 2254 were originally received by the Child Welfare Services on official court commitment. Court and police officials, other than the judges, referred 167 children. The remainder were referred mostly from the schools or other social and health agencies.

# 1949-1951 APPROPRIATIONS \$ 110,654,543

WHERE THE WELFARE DOLLARS GO

## COUNCIL FOR THE BLIND

During this year we were able to render service to 6,180 visually handicapped and blind Pennsylvanians at a cost of \$406,686.74. Of this expenditure \$203,956.69 was from Federal funds. Services were rendered in 66 counties of the Commonwealth. The annual minimum expenditure on any one client was \$1.00 for clinical medical service, the maximum \$3,026.30 for vocational rehabilitation. The per capita cost averaged \$65.81 for the year.

A breakdown of section per capita cost for services rendered follows:

|                            |          |
|----------------------------|----------|
| General remedial eye care  | \$ 51.29 |
| Clinical remedial eye care | 3.03     |
| Home teaching              | 20.00    |
| Rehabilitation             | 547.25   |

Statistical highlights gleaned from several sources during the year follows:

1. The 1950 census indicates that our 1948 State Planning Board estimate of population was accurate to a degree beyond all expectations.
2. The density of blind population is 1,000 times as great in Philadelphia County as it is Pike or Cameron Counties.
3. Causes of blindness in Pennsylvania are not essentially different from the causes of blindness in other states.
4. The incidence of blindness per 1,000 seeing population in Pennsylvania not essentially different from the other states.
5. The incidence of blindness per 1,000 seeing population in metropolitan areas does not essentially differ from the incidence of blindness in the rural areas of Pennsylvania.
6. Pennsylvania's present system of voluntary reporting of blindness has resulted in the registration of and service to more blind persons per 1,000 seeing population than is the case in any other state in the nation.

The State Council for the Blind, Department of Welfare, maintains a Registry of the Blind and visually handicapped of Pennsylvania. For purposes of registration, registry classification is made on the basis of visual acuity in the better eye with best correction. These classifications are as follows:

- |  |   |
|--|---|
| 1. Light Perception<br>Shadows   | 3. $1\frac{1}{2}/60$ - $3/60$ included<br>$5/200$ - $10/200$ included             |
| 2. $\frac{1}{2}/200$ - $5/200$ not included<br>Count fingers & hand movements<br>-/ $60$ to $1\frac{1}{2}/60$ not included | 4. $3\frac{1}{4}/60$ - $6/60$ included<br>$10\frac{1}{4}/200$ - $20/200$ included |

This study includes 5,044 persons who were registered between the dates of September 1, 1947 and May 31, 1949, and for whom we have received complete ophthalmologic information and on the basis of such visual information such persons fall within the registry classifications of 1 to 4. Please note that only visual acuity in the better eye with best correction has been taken into consideration when registry classification has been made - defects of visual fields have not been considered.

The study reveals the following general facts:

| Age 6<br>& Under | Age 6<br>to 16 | Age 16<br>to 40 | Age 40<br>to 60 | 60 years<br>and Over | 56% of the total group<br>were females whereas<br>44% were males. |
|------------------|----------------|-----------------|-----------------|----------------------|---|
| .28%             | .71%           | 8.36%           | 12.84%          | 77.81%               |   |

In classifying the incidence of blindness in this study by sight and type of affection and etiology, the standards as set forth by the Committee on the Statistics of the Blind have been used.

As shown by this study, cataract is the leading cause of blindness and senile cataracts the most prevalent type of cataracts causing blindness. Of the 10,088 eyes studied, blindness was caused in 4,766 eyes by reason of

cataracts.

The following table shows the etiology of the 4,766 cataracts:

|  |     |                              |       |
|--|-----|------------------------------|-------|
| Infectious diseases .....              | 13  | Congenital Cataracts.....    | 179   |
| Trauma .....                           | 33  | Etiology undetermined or not |       |
| General diseases .....                 | 327 | specified.....               | 4,215 |
| (287 of which were caused by diabetes) |     | (senile cataracts)           |       |

Glaucoma falls in second place as the cause of blindness. Of the 10,088 eyes studied, 877 were blind because of glaucoma. Thirty-one of the 877 cases of glaucoma were the congenital type of buphthalmos.

Retinal degeneration including pigmentosa was the third leading cause of blindness in this study with 625 eyes being blinded by this cause. If one considers the total number of eyes blinded by all conditions and diseases of the choroid and retina - 2,191, then glaucoma as the second leading cause of blindness falls into third place and blindness due to involvement of the choroid and retina moves up to second place.

Of the 877 eyes blinded by glaucoma, all types, 344 had received surgical treatment and 567 had received medical treatment.
